SUMMARY

Backend and AI Platform Engineer with 2+ years of experience building scalable distributed systems, enterprise data platforms, and production-grade GenAI infrastructure. Core expertise in multi-tenant architecture, OAuth2/RBAC authentication, high-throughput ETL pipelines (Spark, Hive, Airflow), and AI systems with RAG. Proven impact delivering platforms for 10+ enterprise clients with measurable performance and scalability improvements.

EXPERIENCE

Backend Engineer

Solytics Partners

Jul 2025 – Present

Pune

- Architected enterprise-grade multi-tenant OAuth2 authentication platform with centralized admin console for 10+ clients; implemented RBAC, API key lifecycle management, and secure token exchange—40% faster than Keycloak
- Owned backend architecture for Nimbus platform across 4 modules (EDA, ME, MI, MT), enabling scalable multi-tenant deployments with 60% faster provisioning and strict tenant isolation
- Engineered distributed async processing using Celery + Redis with webhook integrations; achieved 50% latency reduction and 40% throughput improvement
- Integrated Apache Spark for large-scale distributed data processing with dynamic compute scaling for enterprise analytics workloads
- Delivered GenAI analytics platform with LLMs, RAG architecture (Milvus, LangChain) for intelligent insights; designed vendor-agnostic observability layer (Elastic, Datadog, Dynatrace)

Data Platform Engineer

ZS Associates

Jun 2024 – Jun 2025

Pune

- Owned enterprise ETL pipeline architecture for pharma analytics platform processing millions of records; redesigned ingestion layer with Python multithreading and Airflow DAGs—200–300% throughput improvement
- Architected 4-layer data platform: Hive ingestion, preprocessing pipelines, Spark distributed processing, Power BI visualization—reduced reporting latency 40%
- Led Hive query optimization and Spark job tuning initiatives; reduced compute costs and improved SLA adherence for analytics teams
- Re-engineered CI/CD infrastructure on Azure DevOps; achieved 30% faster deployments and 20% higher release frequency across production environments

PROJECTS

ML Analytics Platform — End-to-End ML System

Live Demo

- Architected 5-layer modular platform with multi-user isolation, JWT auth, and automated ML recommendations
- Built ML pipeline supporting regression, classification, clustering with model comparison and Plotly dashboards

Django Tweet — Real-time Social Platform

Live Demo

- Shipped real-time platform with WebSocket streaming, live chat, AI chatbot; Django backend handling 500+ connections

TECHNICAL SKILLS

Languages	Python, Java, JavaScript, SQL
Backend & APIs	Django, REST APIs, Microservices, OAuth2, JWT, RBAC, Multi-Tenant Architecture, Celery, Redis
Data Engineering	Apache Spark, Hive, ETL Pipelines, Airflow, Data Modeling, PostgreSQL, MySQL, MongoDB
AI/ML & GenAI	LLMs, RAG, LangChain, Milvus, Scikit-learn, Pandas, NumPy, Prompt Engineering
Infrastructure	Docker, Kubernetes, AWS EC2, Azure DevOps, CI/CD Pipelines, Elastic, Datadog, Dynatrace
Frontend & Viz	ReactJS, Power BI, Plotly, WebSockets

EDUCATION

B.E. Computer Science

Army Institute of Technology, Pune

2021 – 2025

CGPA: 8.6

ACHIEVEMENTS

Competitive Programming: Codeforces Specialist (1528), CodeChef 5-Star (2000+)

Leadership: Secretary, Coding Club (100+ members); Joint Secretary, Technical Board
